-------------------------------

Book Article or Chapter from a GALILEO Database  [p.205, APA Handbook]

-------------------------------

Government Document  [pp. 205-206]

Adding DOI References to Citations

What is a DOI?

A DOI (digital object identifier) is a unique number assigned by publishers to journal articles, studies and book chapters available online. When include the DOI in your citation, it will be easier for a reader to locate the version of the work you cited.

How will I recognize a DOI number?

The DOI is made up of two components, a prefix and a suffix, separated by a forward slash.

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Suffix</th>
</tr>
</thead>
<tbody>
<tr>
<td>10.311057/2511450135253</td>
<td></td>
</tr>
</tbody>
</table>

Where do I find a DOI number?

The DOI number for an online article will usually be found on the home page. It may also be found at the top or end of the full-text version of an article.

Where is the DOI placed in a citation?

The DOI should be added to the end of the citation, as follows:

What if the article has a different number?

Some databases use their own numbering systems for articles. For instance, some Proquest databases use an ID number, and certain EBSCO databases use an accession number (example: AN2530410). **These are not the same as a DOI (digital object identifier).**

---

What if there is no DOI number?

**Article from an online journal (no DOI number) - use the URL for the web page [p.198 APA Handbook]**

http://www.urban.org/publications/411933.html

**Article from a GALILEO database (no DOI number)**

Note: The APA handbook states that it is not necessary to include database information [p.192].
